

Affordable Solutions
for Farm, Home
and Worksite.

LEGENDARY EQUIPMENT.
RELIABLE SERVICE.
TRUSTED NAME.

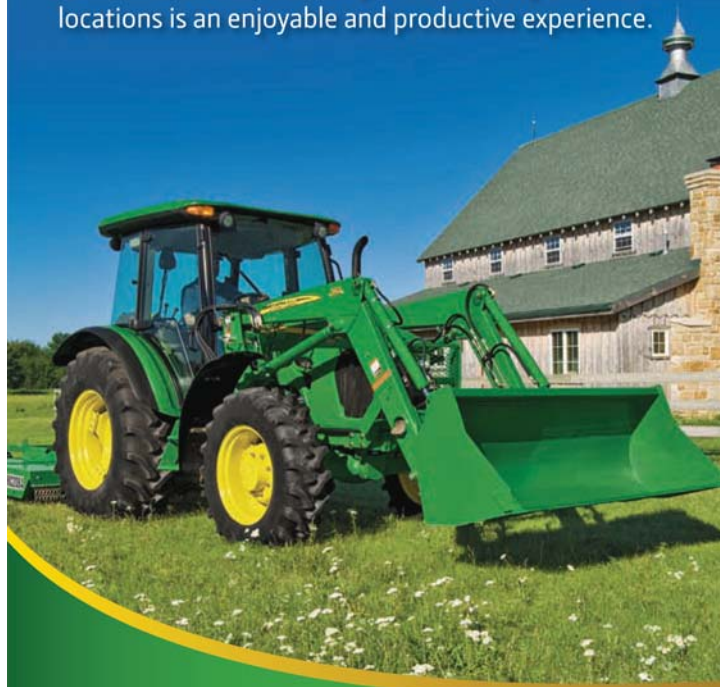

Experience the TriGreen difference —
18 locations offering experience,
knowledge and superior products.

DIG INTO OUR HISTORY

TriGreen Equipment, LLC was formed in 2006 from several existing dealers who wanted to provide more for their customers. Long before that, we'd been building our presence in Tennessee, Alabama and Mississippi. Now, we're continuing that legacy. With 18 full-service John Deere dealerships, our team works hard to ensure that your visit to any one of our locations is an enjoyable and productive experience.

*Our mission is to be the clear choice
that exceeds the dynamic needs of
people who live, work and derive
enjoyment from the land.*

WE SERVICE:

- Residential
- Commercial
- Small & Large Ag
- Grounds Care
- AMS
- Commercial Worksite

MAXIMIZE YOUR EFFICIENCY

John Deere Ag Management Solutions (AMS) precision farming represents the intersection of technology with traditional Ag practices. Using GPS tracking and on-board sensors, your farm equipment can monitor crops and provide money-saving data regarding fertilizer and herbicide applications.

By using satellites to map yield data and by utilizing soil test information, these technologies can lower production costs by fine-tuning seeding, fertilizer, chemical and water use, and potentially increase productivity. It can also help reduce environmental impact by allowing farmers to place these applications only where needed and at the most efficient rate.
